

## Home Learning - Year 1

Science	RE

#### How do you think we can classify what animals eat?

https://www.bbc.co.uk/bitesize/topics/z6882hv/articles/z96vb9q Use this link to discover what carnivore, herbivore and omnivores are.

Once you have learned about these can you prepare a meal for each animal. Think about what a carnivore will eat, what an omnivore will eat and what a herbivore will eat. We wish we could have a tea party altogether but instead you can throw one for the stuffed animals you have at home. Don't forget to send us some pictures!

### Why do you think Jesus performed miracles?

https://www.youtube.com/watch?v=uupg0V-17NU

Learn about a miracle that Jesus performed. Why do you think he did this?

If you could perform miracles what would you do? Have a discussion with someone about this? Do you have the same ideas?

#### **Art and Design**

#### What do you notice about a tiger's face?

#### https://switchzoo.com/newzoo/zoo.htm

Please use the above link to create your own animal with all sorts of different textures and patterns.

After you have made it online can you recreate it using pencils and papers. Send in your animals to our class email so we can see!

# Science What can you use your 5 senses for?

Time to use your 5 senses again.

Can you make a senses station? You could make up little pots of things to smell, taste and touch.

What words would you use to describe the taste of things?

What words would you use to describe the smell of things?

What words would you use to describe the feel of things?

Can you record your findings in some way?
